EMC cable entry and bottom plate gasket

CONNECT AND PROTECT

Description: The bottom of the enclosure is sealed by the use of an adhesive gasket applied to the frame around the bottom opening. The cables are sealed by the addition of adhesive foam placed between the bottom plates. The elasticity and the size of this foam ensures a tight seal around most cables. Added conductive material provides a good contact to shield the transfer of electro-magnetic radiation.

Pack quantity: 2 m adhesive EMC gasket for cable entry. For 1600 mm wide enclosures please order 2 sets.
