BPF9001

Side mounting kit

CONNECT AND PROTECT

For	BP4008
Item no.	BPF9001

Description: The side mounting kits make mounting on the side of an electrical enclosure possible when there is limited space on the top. The side mounting kit maintains the TYPE / IP rating. They mount in a standard electrical knockout.

Material: Aluminium in BPF9001 and 9002, and stainless steel 303 in BFP9003 and 9004.

Pack quantity: 1 piece.

The side mounting kit allows for a vortex cooler to be installed in the field and in many different positions outside of the enclosure, which means it can be used in many different applications. Without this kit, the vortex cooler can still be installed in the field, but only on the enclosure's roof.
