CCG00

Cable entry grommet

CONNECT AND PROTECT

Cable diameter (mm)	0
Item no.	CCG00

Description: Mounted together with the CCF cable gland plate, CCG grommets are used to easily route cables fitted with connectors. The grommet is positioned around the cable and is equipped with catch hooks that anchor themselves in the CCF cable gland plate. Strain relief is achieved by using a simple cable tie.

Material: Thermoplastic rubber, halogen free.

Temperature resistance: -40ºC to +80ºC.

Flammability: HB according to UL94.

Finish: Black.

Protection: IP 54 with suitable gland plate and cables.

Pack quantity: 10 pieces.

Open cable grommets can be used for installing cables that are already fitted with connectors before inserting them through the cable entry frame. This allows for fast, economical and tool free handling of cables.
