PLFR1/4

Air regulator kit

CONNECT AND PROTECT

Item no.	PLFR1/4

Description: Air pressure regulator with pressure dial, and manometer to adjust the air pressure. It filters condesated water and particles (>5µ). Maximum inlet pressure 13 bar, and at max pressure maximum temperature: 40 °C. Connection 1/4".

Delivery: Air pressure regulator and water trap.

This air pressure regulator with integrated pressure dial and manometer is used to adjust the air pressure in order to make the vortex cooler operate more efficiently. It filters both condensed water and particles.
